

郑州大学

生产实习报告

专	业	软件工程	
班	级	_ 软工四班	
学	号	202124100508	
灶	夕	学 股	

计算机与人工智能学院 2024 年 7 月

实习时间	2024年6月27日至7月6日	实习地点	3 楼机房		
实习单位	东方瑞通(郑州)咨询服务有限公司				
指导教师	梁鹏				
项目名称	VisionVoyage-基于鱼眼相机与其他感知技术的自动驾驶仿真系统				

实习目的:

- 1. 提高团队协作能力:在团队中分工合作,使用版本控制工具(如 Git),在实验过程中,采用敏捷开发模式(如 Scrum),学习快速迭代、持续反馈和改进的方法,提升学生在动态环境下开发人工智能项目的能力,提升团队协作和沟通能力。
- 2. 了解在人工智能领域的应用: 通过具体实验,熟悉 Python 在人工智能中的广泛应用,包括数据处理、模型训练、结果评估等。
- 3. 掌握基本的人工智能算法和模型: 学习并实现常见的人工智能算法,如线性回归、决策树、神经网络等,理解它们的原理和应用场景。
- 4. 提升 Python 编程能力: 强化对 Python 语言的掌握,尤其是使用 Python 进行数据分析、模型构建和优化的能力,熟悉相关的库和工具(如 NumPy、Pandas、Scikit-learn、TensorFlow、Keras 等)。
- 5. 熟悉人工智能项目的开发流程: 从数据预处理、模型选择与训练、模型评估与优化,到结果解释与应用,全面了解人工智能项目的完整开发流程。
- 6. 培养解决实际问题的能力: 通过实验项目中的实际问题,学会分析问题、设计解决方案、实施并验证效果,提升在实际场景中解决问题的能力。
- 7. 关注人工智能领域的前沿技术和发展趋势: 了解当前人工智能领域的最新研究成果和技术发展趋势,培养创新意识和行业敏锐度。
- 8. 提升职业素养和专业能力: 通过严格的实验规范和要求,培养职业素养,提升在未来工作中的专业能力和素质。
- 9. 激发创新意识: 在实验过程中探索新方法、新技术,提出创新性的解决方案,培养独立思考和创新能力。

项目简介:

VisionVoyage: 基于鱼眼相机与其他感知技术的自动驾驶仿真系统

VisionVoyage 是一款先进的自动驾驶仿真系统,利用鱼眼相机和多种感知技术,旨在提供全面的仿真环境和多样的应用场景。该项目采用了多种先进的技术和框架,确保系统的高效性、稳定性和易用性。

关键技术和框架:

语言和界面:

GUI 界面: 采用 PyQt6 和 PySide6 开发,提供简洁、直观的用户界面。这两个框架都是 Qt 框架的 Python 绑定,Qt 是一个跨平台的 C++ 框架,专注于开发图形用户界面应用程序。

后端: 采用 Python 3.8 和 C++17 实现, 遵循 PEP8 规范, 确保代码的规范性和可维护性。

开发环境及框架:

Unreal Engine 4: 从 Epic 官方 GitHub 仓库克隆源码,使用 clang++-10 编译生成 UE4Editor。支持主流操作系统平台,如 Linux、Windows、macOS。本项目实际使用的是 Ubuntu 20.04.6 LTS Desktop,并结合 CUDA 11.8 和 CUDNN 8.6.0 进行 GPU 加速。

资源整合: 使用 QRC (Qt Resource Collection) 整合本地资源,提升系统的 稳定性和性能。

感知技术:

语义分割: 使用 MMSegmentation 作为语义分割框架,结合 Mask2Former 和 Seg2Former 等深度学习模型,实现对图像的高效处理和分析。

鱼眼相机应用: 鱼眼相机通过压缩和扭曲大角度范围内的光线,提供 180° 视角的环境数据。通过拼接多个相机图像,去除扭曲和变形,实现 360° 全景影像功能。在泊车场景中,结合超声波雷达,实现停车线识别和障碍物检测。在自动驾驶系统中,鱼眼相机还用于车道线识别、交通信号灯识别和路况检测,提高行车安全性。

用户平台/环境:

操作系统: 推荐使用 Ubuntu 18.04/20.04 LTS Desktop,兼容 Windows 10/11。 采用 C/S 架构,并采用前后端分离方案,提升系统的扩展性和维护性。 技术挑战和创新:

尽管鱼眼相机具有广泛的应用前景,但公开发布的鱼眼数据集非常有限,除了WoodScape 数据集外,几乎没有其他数据集提供真正的语义分割注释。此外,目前针对鱼眼摄像头,还没有一个量产的、基于多摄像头组合的语义分割算法,大部分工作都集中在独立解决个别任务上。现有的编码器是共享的,但解码器之间没有协同作用。同时,现有的数据集主要是为了特定任务而设计,并没有为所有任务提供同时注释。鱼眼图像的畸变问题,使得传统的语义分割模型难以取得良好效果,需要设计特定的处理模块来应对这些挑战。

应用场景:

通过结合计算机视觉和深度学习技术,VisionVoyage 实现了对鱼眼相机获取的 图像进行实时处理和分析,使车辆能够更准确地理解并适应不同的交通场景。鱼 眼相机还用于实现车辆周围的盲区监测,提高行车安全性。通过将鱼眼相机获取 的图像与高精度地图数据进行融合,还可以实现更精准的定位和路径规划,为自 动驾驶系统提供更可靠的导航和控制支持。

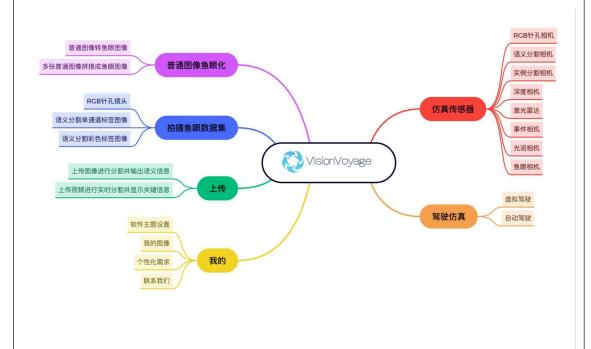

VisionVoyage 致力于推动自动驾驶技术的发展,通过提供一个强大的仿真环境,帮助开发者进行测试和验证,从而加速自动驾驶技术的商业化进程。

个人承担工作:

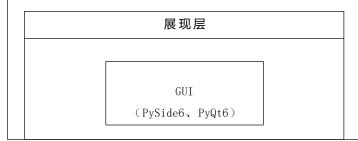

个人承担工作:

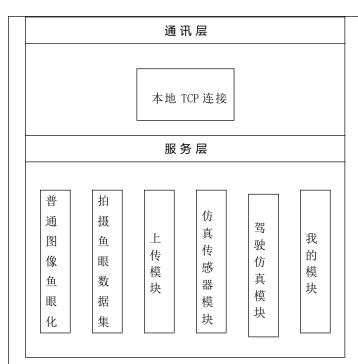

- ①软件运行等待窗口,加载界面
- ②利用 MMsegmentation 语义分割框架识别图片(部分)

   # 遍历输入图片路径列表
   for img_path in args.image_paths:
       if img_path.endswith('.png') or img_path.endswith('.jpg'):
           # 构建输出文件路径
           config_path,
                                    checkpoint_path
assignConfigByResolution(img_path)
```

```
filename = os. path. basename (img path)
           output_path = os.path.join(output_dir, filename)
           # 从配置文件和权重文件构建模型
                         init_model(config_path, checkpoint_path,
           model
device='cuda:0')
           # 推理给定图像
           result = inference model (model, img path)
           # 保存可视化结果
           show_result_pyplot(model, img_path, result, show=False,
save_dir=output_dir, out_file=output_path)
           cv2.namedWindow("Press ESC to exit", cv2.WINDOW NORMAL |
cv2. WINDOW_GUI_NORMAL)
           cv2.resizeWindow("Press ESC to exit", 800, 600) # 设置窗
口大小为 800x600
           mat = cv2. imread(output_path)
           cv2.imshow("Press ESC to exit", mat)
           while True:
               if cv2. waitKey(1) == 27: # 按下 esc 键的 ASCII 码为 27
                   cv2. destroyWindow("Press ESC to exit")
                   break
```

个人遇到的主要问题及解决方法:

1. 路径和文件名错误

问题

QCoreApplication.setLibraryPaths() 和 qInitResources() 所使用的路径可能不正确,导致资源无法正确加载。

os. path. abspath(__file__) 获取的路径在某些情况下可能不正确,特别是在打包或跨平台使用时。

解决方法

确保路径的正确性,使用相对路径来确保跨平台兼容。

使用环境变量或配置文件来动态设置路径。

current_dir = os. path. dirname(os. path. abspath(__file__))

QCoreApplication. setLibraryPaths([os. path. join(current dir, "lib")])

2. 模块和库导入问题

问题

需要导入的模块和库可能在路径中找不到,导致 ImportError。

解决方法

确保所有需要的模块和库都在 PYTHONPATH 中。

使用虚拟环境并安装所需依赖项。

try:

from sensors. fisheye capture import FisheyeCapture

 $\label{loging_arguments} from & backends. \ common. \ cli_parser & import & create_parser, \\ add_logging_arguments & \\$

import backends.common.resources

from utilities.logger import get_logger

```
except ImportError as e:
   print(f"Error importing modules: {e}")
   sys. exit(1)
3. 未处理的异常
问题
代码中未处理的异常可能导致程序崩溃。
解决方法
在关键部分添加异常处理逻辑,确保异常能够被捕获并处理。
try:
   # 关键代码段
except Exception as e:
   print(f"An error occurred: {e}")
   sys. exit(1)
4. 资源初始化问题
问题
qInitResources() 函数可能无法正确初始化所有资源,导致后续使用资源时出
错。
解决方法
确保资源文件路径正确,并且资源文件已经被正确加载。
try:
   qInitResources()
except Exception as e:
   print(f"Resource initialization failed: {e}")
   sys. exit(1)
5. 线程问题
问题
```

如果 FisheyeCapture 或其他组件在单独的线程中运行,可能会出现线程同步问

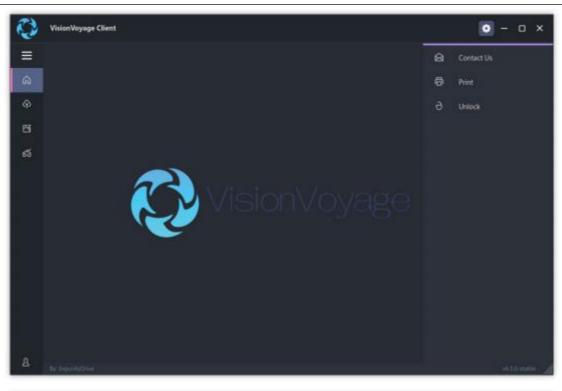

题。

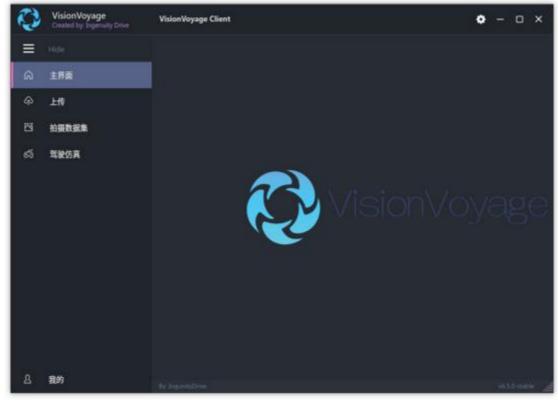

解决方法

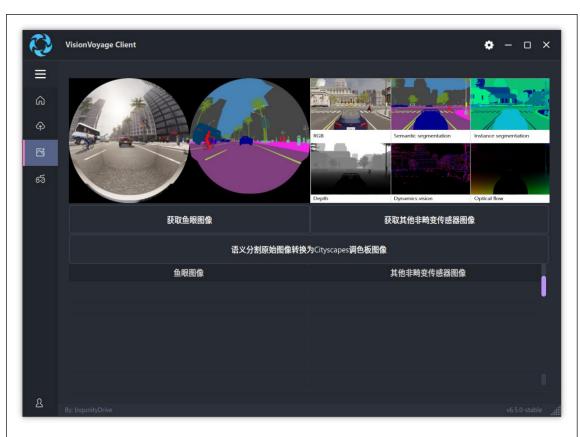

```
确保所有线程操作是线程安全的,使用线程锁或其他同步机制。
import threading
capture_lock = threading.Lock()
def start_capture():
  with capture lock:
      capture = FisheyeCapture(args.device)
      capture. start()
6. 平台相关问题
问题
在不同操作系统上,库和资源的路径及权限可能会有所不同,导致不兼容问题。
解决方法
使用平台检测代码,并根据不同平台设置不同的路径或库。
import platform
if platform.system() == "Windows":
  # Windows 相关设置
elif platform.system() == "Linux":
   # Linux 相关设置
7. 性能问题
问题
在处理高分辨率视频或复杂的计算任务时,可能会出现性能瓶颈。
解决方法
优化代码, 使用并行计算或硬件加速。
import multiprocessing
def process_frame(frame):
   # 帧处理代码
```

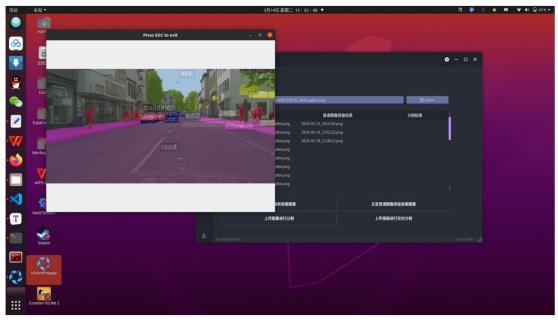

```
pass
with multiprocessing. Pool (processes=4) as pool:
   results = pool.map(process_frame, frames)
8. 依赖项版本问题
问题
依赖的第三方库版本不兼容,导致功能异常或缺失。
解决方法
使用 requirements.txt 或 Pipfile 锁定依赖项版本,并定期更新。
# requirements.txt
PyQt6==6. 2. 0
some_other_library==1.4.2
9. 用户权限问题
问题
在某些操作系统上,访问某些资源(如摄像头、GPU)需要特定权限。
解决方法
提前检查并申请所需权限。
import os
if not os.access("/dev/video0", os.R_OK):
   print("No read access to the camera device.")
   sys. exit(1)

个人实习体会及收获:

在 VisionVoyage 项目开发的整个过程中,我们团队展现了卓越的协调能力和专业素养。每位成员都肩负起了明确的职责,通过设计、开发、测试和优化各个环节,逐步提升了项目的整体质量,确保项目按时达成预期目标。这个过程中,我们不仅深化了专业技术的理解,还掌握了敏捷开发的方法,涵盖团队合作、计划制定和文档撰写等关键环节。这些经验将为我们未来的职业生涯打下坚实基础。

在项目实施过程中,我们深刻体会到团队合作的力量。团队精神促使我们目标一致,形成了强大的凝聚力和战斗力。通过明确分工,我们将整体目标细化为每个成员的具体任务,确保了工作的高效推进。正是这种协同合作,使我们能够在项目中不断创新并实现这些创新,最终达成共识。

我们还认识到,团队中的多样性是推动项目进展的重要因素。我们学会了在不同观点中寻求共识,通过充分的讨论和协商,找到最佳的解决方案。在项目开发过程中,我们迎接了诸多挑战,每一位成员都展示了坚韧不拔的精神和创新的勇气。我们从中总结了宝贵的经验教训,为未来的个人成长和团队发展注入了新的动力。

通过这次项目的开发,我们深刻认识到,软件开发过程从来不会一帆风顺。每个成员都是一个独立的个体,有着各自的思维和判断。作为一个整体的团队,我们学会了包容,学会了在差异中寻求共识,通过讨论和协商获得最佳的解决方案。这次项目的成功不仅满足了用户的核心需求,也为我们积累了宝贵的经验,为未来的发展奠定了坚实的基础。

总体而言,	VisionV	oyage 项	目的开发对		一位成员为	 表说,都是	是一次宝	贵的
学习和成长	经历。我	 找们不仅提	是升了专业技	支能,还	在团队合作	作、创新	思维和问	题解
决能力方面	「取得了』	显著进步。	我们相信,	这次项	目的成功组	全验将为	我们的未	来发
展提供强大	的动力和	和支持。
